The advantages for you

Frozen yoghurt is a delicious twist on regular yoghurt but has a creamy texture that resembles ice cream. Thanks to its trendy and healthy image, the refreshing Frozen Yoghurt ice cream will allow you to attract a new target group. Many people choose Frozen Yoghurt because of the range of flavours and toppings.

The machine does not feature a pump, which makes it very easy to clean. In addition, the machine is available as a self-service version. The auto-return lever and the deactivated control panel allows people to serve their own soft serve. Extra efficiency for your business and an even more pleasant experience for guests.
